

## Enviroscape® Landfill

### Building community confidence in modern landfill systems Demonstrating safe MSW management and groundwater protection

#### Using your EnviroScape® Landfill you can:

Show how old-style dumps contaminated their local aquifers

Draw samples from monitoring and drinking water wells

Show how modern landfill liners work and what happens in the event they fail

Develop activities to show local integrated solid waste management practices

Demonstrate leachate formation and various management methods

Operate a transfer station or HHW program, a recycling center, back yard composting

Groundwater protection

Leachate recirculation
